

# Cardano currency

Cardano currency is modern, clean and  
Making The World Work Better For All

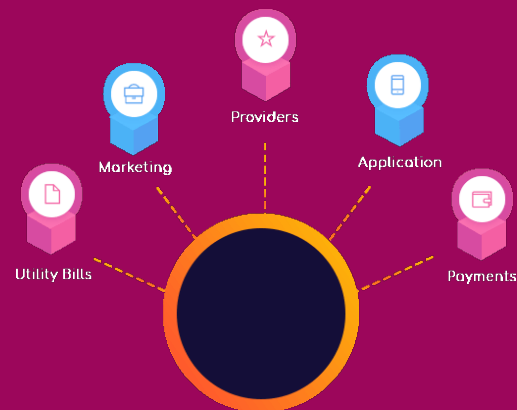

First decentralized marketing platform that allows  
merchants and affiliates.

# ABOUT CARDANO CURRENCY

Cardano currency aims to disrupt the crypto trading industry by lowering the barrier to creating algorithmic trading models.

We built a platform for The crypto trading Industry

Crypto currency exchanges or digital currency exchanges (DCE) are businesses that allow customers to trade crypto currencies or digital currencies for other assets.

Crypto currency exchanges or digital currency exchanges (DCE) are businesses that allow customers to trade crypto currencies or digital currencies for other assets

Creators of digital currencies are often independent of the DCEs that trade the currency.[6] In one type of system, digital currency providers (DCP), are businesses that keep and administer accounts.

# PROBLEM

More than \$40 million in assets were placed under restraint pending forfeiture, and more than 30 Liberty Reserve exchanger domain names were seized.

# PROBLEMS

Different pieces of the new Internet are born as building blocks, but there's no way for them to work together.

Even interoperating new technologies with old centralised resources can prove useful in making the paradigm shift from Web 2 to Web 3 happen. Now we own our data, we can prove that we own what we have and have created it on different platforms, but how do we put it together into a whole new cohesive framework.

# SOLUTION

More than \$40 million in assets were placed under restraint pending forfeiture, and more than 30 Liberty Reserve exchanger domain names were seized.

## SOLUTIONS

Decentralized **crypto currency** is produced by the entire **crypto currency** system collectively, at a rate which is defined when the system is created and which is publicly known.

In centralized banking and economic systems such as the Federal Reserve System, corporate boards or governments control the supply of currency by printing units of fiat money or demanding additions to digital banking ledgers.

**OUR COIN**

Decentralized crypto currency is produced by the entire crypto currency system collectively at a rate which is defined when the system is created and which is publicly known.

# CARDANO CURRENCY

The validity of each **crypto currency** coins is provided by a block chain. A block chain is a continuously growing list of records, called blocks, which are linked and secured using cryptography. Each block typically contains a hash pointer as a link to a previous block, a timestamp and transaction data. By design, block chains are inherently resistant to modification of the data. a block chain is typically managed by a peer-to-peer network collectively adhering to a protocol for validating new blocks. Once recorded

The block time is the average time it takes for the network to generate one extra block in the block chain] Some block chains create a new block as frequently as every five seconds.

# TEAM

A crypto currency (or crypto currency) is a digital asset designed to work as a medium of exchange that uses cryptography to secure its transactions.

# ADVIORS

Digital currency is a money balance recorded electronically on a stored-value card or other device. Another form of electronic money is network money.

## CARDANO CURRENCY IS A BLOCK CHAIN PLATFORM

Cardano currency is a block chain platform for change makers, innovators, and visionaries, with the tools and technologies required to create possibility for the many, as well as the few, and bring about positive global change.

## CARDANO CURRENCY IS A PROOF-OF-STAKE BLOCK CHAIN PLATFORM

Cardano currency is a block chain platform for change makers, innovators, and visionaries, with the tools and technologies required to create possibility for the many, as well as the few, and bring about positive global change.

# UNPARALLELED SECURITY

Cardano currency makes it possible for any actors that do not know each other - and have no reason to trust one another - to interact and transact, securely. It's a platform for building trust where none might naturally exist, opening up whole new markets and opportunities. Through Ouroboros, Cardano currency is provably secure against bad actors and Sybil attacks. Every transaction, interaction, and exchange is immutably and transparently recovered, and securely validated using multi-signature and a pioneering extended UTXO model.
